Who We Are

At IME, we believe that ideas can transform spaces—and that spaces can transform emotions.

For over 37 years, we've been dedicated to creating memorable experiences through theming, ambiance, art, technology, and emotion. We turn ordinary places into environments that connect deeply with people.

We specialize in themed decorations, stage sets, display cases, floats, indoor and outdoor installations, animatronics, lighting, sound, projections, and special effects. Our designs are tailored for shopping malls, stores, restaurants, theme parks, public spaces, and brands that understand the value of creating more than just a space—but an experience that leaves a lasting impression.

Headquartered in the United States and with projects across various countries, we work every day with the same purpose we've had since the beginning: to create something that feels real, resonates emotionally, and is always worth remembering.

Mission

Our mission is to create experiences that evoke genuine emotions and forge authentic connections between spaces, brands, and people.

We support our clients throughout the entire creative and technical process, handling every detail with passion, responsibility, and a clear vision: to bring each project to life in a unique and meaningful way.

Vision

Our vision is to strengthen our position as global leaders in the development of immersive, themed experiences—bringing our work to new spaces, audiences, and cultures.

We believe in the value of craftsmanship, in the power of purposeful design, and in emotion as a tool for connection. Today, we're taking the next step. After years of building a strong presence throughout the Americas, we are expanding into Spain—a country that inspires us with its culture, artistic sensibility, and celebratory spirit.

We want to continue adding stories, plazas, cities, and unforgettable moments that leave a mark.

Our History

IME was born from the dream of a child who always imagined bringing his ideas to life in the real world.

That dream took shape in 1989 with the founding of Industrial Magic & Entertainment, starting in a small garage with a clear vision: to create spaces that connect with people through emotion and creativity.

Along the way, the founder had the opportunity to join the team at The Walt Disney Company, gaining experience in high-level productions that further enriched his professional and artistic vision.

Today, with headquarters in the United States, IME has completed more than 2,650 projects in countries such as the United States, Mexico, Brazil, Colombia, Argentina, Chile, Canada, Puerto Rico, the Dominican Republic, Panama, Costa Rica, Ecuador, Peru, Aruba and Venezuela

We have transformed shopping malls, stores, theme and water parks, plazas, façades, and institutional spaces through scenographies, settings, showcases, and themed creations designed to connect, make an impact, and move people emotionally.

And although much has evolved since that first workshop, the essence remains unchanged: to create something that is felt, that inspires, and that is always worth remembering.

Our Values

Passion for what we do: Every project is an opportunity to give our very best.

Commitment: We take responsibility for what we promise—and for those who place their trust in us.

Quality: We care deeply about the process, the details, and the final result.

Innovation: We seek creative, efficient, and unique solutions.

Closeness: We work as a team, grounded in empathy and trust.

Experience: Over three decades creating projects that people remember.
